

SERIAL TO COMPACT
FLASH (CF)

SHRESTA - INNOVATING ELIFE

Serial connectivity is a flexible, low cost interface choice for a wide variety of peripherals and applications. Our Serial to Compact Flash (CF) card provides a simple solution for adding serial ports to computing devices. Applications are endless and may include devices that use Compact Flash Cards to store data or to exchange data between embedded device and personal computer. Compact flash cards are small, light weight and have low power requirements
